

Crypton Electronic Co.,Ltd

General introduction:

Bemade of superior components with international hi-tech;Quality guaranteed

Switching Power Supply for Access Control

Application:

Be applied to building talkbacks and kinds of access controllers

Functions:

Non-include batteries

With NC/NO outputs it can be used for all kinds of electric lockers.
It has time prolongation control circuit unlock duration adjusting but!on with time range 0-10s.
It is deployed with unlock but!on that can unlock directly.
It has auto protection fuse and power switch.

Crypton Electronic Co.,Ltd

Optional built-in 12V 7AH rechargeable battery.

Adjustable output voltage at range 11-14V.

It gives stable voltage output,which provides stable work condition for electronic.

Dual +12V output

It has auto protection,built-in fuse.

But the outer batteries.

Technology Parameters

AC Input Voltage	AC 220V 50Hz (110V 5A customized)
Output Voltage	DC12V
Output Electric Current	5A
Output Power	60W
Operating Temperature	-20°C-+60°C
Operating Humidity	90%

Address:Office No.906,MinZhi Building,Bao'An district,Shenzhen,PRC
